

Logistics Section Staffing  
and Functions

The new Table of Organization for the Logistics Section provides  
for [REDACTED]

25X9

Based on the known Area Division averages for number of Logistics positions required for total personnel serviced, vehicles controlled, and 08 - 09 funds, WE is under the average only for 08 - 09 funds expended. (Tab G ) Since they are expending more 08 - 09 money, it would appear that more personnel are required than a comparison with numbers of personnel serviced would indicate. However, a comparison with three other Area Divisions indicates that the proportion of requisition and line items handled by WE personnel is less than in the other Divisions. (See below - Figures for all Area Divisions were not available.)

SEP 12 1957  
EE WE FE  
Div. 1 Div. 2 Div. 3 WE \*

Aver. Req. Monthly  
No. of Line Items per Req.  
No. of "on duty" Logs. Pers.  
No. of Req. per Month per Person

25X9

An estimated 12 original or amended Logistics Annexes were prepared in a one year period but no comparison with other Divisions was made.

There was no significant backlog of work in the Section at the time of the review.

Although not conclusive, these comparisons indicate that the Logistics Section is not understaffed and that they should be able to absorb the Headquarters Logistics functions without an increase in T/O. The comparisons were made with Logistics Sections of the other Area Divisions which do perform this function. The time required was estimated to be three hours daily in the survey made in 1955. However, the highest estimate for any other Division was only two hours.

\* Does not include Headquarters requisitions issued by the Office of the C/SS.
